

Premiere BG-10BIVRC

BG-10BIVRC 0.2 Micron Nanofiber Replacement Cartridge

The Premiere BG-10BIVRC nanofiber replacement cartridge removes contaminants and pathogens as small as 0.2 micron. This replacement water filter cartridge can be used in a broad range of filtration applications including whole house or point-of-use water filtration. It removes viruses, bacteria, cysts, particulates, and other biological hazards. The pleated design of the BG-10BIVRC cartridge creates enormous internal surface area providing high capacity for contaminant removal.

Features

0.2 Micron Filtration

- ✓ Removes submicron pathogens through absolute charged nanofiber technology
- ✓ Removes more than 99.99% of viruses and bacteria, and more than 99.95% of cysts

Nanofiber Technology

- ✓ Fine particle retention and filtration capacity
- ✓ Inhibits the bacteria that causes biofouling in reverse osmosis membranes
- ✓ High Zeta potential for effective removal of ultrafine contaminants

Added Benefits

- ✓ Drop-in replacement cartridge makes for easy installation (no activation required)
- ✓ Operates in wide pH range (4-9pH)
- ✓ Very low pressure drop (approximately 2 psi) means high flow rate

Specifications

Micron Rating	0.2 Micron
Flow rate	10 GPM
Size	4.5" D x 10" L

Contaminant Removal

- ❖ Bacteria
- ❖ Cryptosporidium,
- ❖ Cysts
- ❖ Escherichia coli (E. coli)
- ❖ Giardia
- ❖ Iron
- ❖ Legionella
- ❖ Manganese
- ❖ Norovirus
- ❖ Polio
- ❖ Pseudomonas
- ❖ Rotavirus
- ❖ Sediment
- ❖ Viruses
- ❖ And other biological hazards
