

Premiere SS210-TWH

SS210-TWH Tankless Water Heater Filter System (Stainless Steel)

The Premiere SS210-TWH stainless steel tankless water heater filter protects the heat exchanger in a tankless water heater and helps avoid tank failure. The housing is made from 316L stainless steel which withstands stressful conditions and is corrosion resistant. The SS210-TWH tankless water heater filter system contains a cartridge with scale inhibitor to stabilize your water and prevent scale from forming. The scale inhibitor will also loosen any existing scale deposits so that they may be flushed away by the water flow over time.

Features

Stainless Steel Housing

- ✓ Highest quality 316L stainless steel
- ✓ Resilient to corrosive substances and chemicals
- ✓ High durability and long life compared to plastic housings which can burst or fail, causing damage such as flooding
- ✓ Positive cartridge sealing with "sure seal" ring nut connector

Corrosion and Scale Inhibitor Filter

- ✓ The center of the water filter cartridge contains genuine Siliphos® corrosion and scale inhibitor which are polyphosphate silicate spheres
- ✓ Siliphos® forms a thin protective layer on metal surfaces to inhibit deposits of scale and corrosion
- ✓ 68 deep grooves increase surface area, enhance contaminant holding capacity, and promote fuller utilization of the depth-matrix for fewer cartridge change outs

Added Benefits

- ✓ 10 year warranty on housing
- ✓ NSF® tested (Standard 42)
- ✓ Drain opening at bottom of housing for easy flushing and cleaning
- ✓ Unrestricted water flow of up to 16 gallons per minute which meets the water pressure demands of a tankless water heater

Specifications

Flow Rate	16 gallons per minute
Pipe Connections	1" FPT (female pipe thread)
Maximum Pressure	300 PSI rated
Maximum Temperature	210° F
Dimensions	4.25" D x 24" H
Applications	Hot or cold water; chlorinated (municipal) or non-chlorinated (well water) systems

Contaminant Removal

- ❖ Cloudiness / turbidity
- ❖ Sediment
- ❖ Dirt
- ❖ Silt
- ❖ Sand
- ❖ Scale
