

Premiere PS-SQC50

PS-SQC50 Reverse Osmosis System

The PS-SQC50 by Hydro Guard is a 4-stage reverse osmosis system that delivers clean, safe drinking water. This system has the filtration capacity of a 5-stage RO system, with the advantage of less filters to replace making it a more cost-effective system. The PS-SQC50 is easily installed and has sanitary, quick-connect filters. One of the revolutionary features of the PS-SQC50 is its leak detector shut off valve (FLOWLOK™) which silently guards against any water leaks which may occur. It also has a water pressure regulator to protect your system from water hammer and spikes in water pressure. The PS-SQC50 features a compact design and provides quality water from your tap whenever you want it.

Features

Safe, great tasting drinking water

- ✓ Reduces up to 99% of lead, nitrates, cysts, arsenic, sodium and other contaminants
- ✓ The included handheld TDS meter measures the total dissolved solids of a solution. This provides confidence that the system is doing its job and can also indicate when it's times to change your filters

FLOWLOK™ and SHOKBLOK™ Technology

- ✓ FLOWLOK™ leak detector shut off valve silently guards against any water leaks. If the FLOWLOK™ disc detects water it expands and pushes the shut off lever to turn the water off to the system
- ✓ SHOKBLOK™ pressure regulator protects your system from water hammer and spikes in water pressure

Added Benefits

- ✓ NSF certified materials
- ✓ 3 year limited warranty
- ✓ Sanitary, quick-change water filters only need to be changed once per year

Specifications

Operating Capacity	50 gallons per day
Tank capacity	4.5 gallons
Size	15" H X 14.6" L X 4.6" W
Operating Pressure	50 – 80 PSI

Substance Removal

Algae • Arsenic • Barium • Cadmium • Chlorine • Chloramine
• Chromium • Cloudiness / Turbidity • Cysts •
Cryptosporidium • Dirt • Dissolved solids • Fluoride • Giardia
• Heavy metals • Iron • Lead • Manganese • Microorganisms
• Mercury • Mold • MTBE (methyl tertiary butyl ether) •
