

PS-2000PB Two Stage Ultrafiltration Membrane System

The Premiere PS-2000PB has a 0.02 micron ultrafiltration (UF) membrane which removes particulates and solids on a microscopic level. The activated carbon block post filter reduces lead (soluble and particulate), VOCs, chemicals, heavy metals, chlorine, chloramine, PFOA, PFOS, and other man-made chemicals. It's a powerful and highly effective filtration system for residential and commercial applications. With a high flow rate of up to 8 gallons per minute, this system operates smoothly at low water pressure and does not require electricity. Since it produces water on-demand, it does not need a storage tank. The Premiere PS-2000PB is uniquely designed to let you easily flush (clean) the membrane when it gets full of contaminants – just turn a valve. This means the UF membrane has an exceptionally long life of up to 5 years!

Safe, Clean Water – 0.02 Micron Filtration

- ✓ 0.02 submicron UF membrane removes bacteria (over 99.9999%), viruses (over 99.99%), and protozoa like giardia & cryptosporidium (over 99.95%) from your water
- ✓ 0.5 micron coconut shell activated carbon block filter reduces contaminants and impurities, using chemical adsorption.

Extra Long Membrane Life

- ✓ Innovative system lets you turn a valve to easily flush (clean) the UF membrane of contaminants
- ✓ Backflush on a regular basis to ensure the longest membrane life (3 - 5 years)
- ✓ More economical than replacing filters or membranes that can't be flushed

Filters 8 GPM, Produces No Waste Water

- ✓ Delivers consistent water quality regardless the condition of the incoming water
- ✓ High flow rate of up to 8 gallons per minute
- ✓ Environmentally friendly filtration – no chemicals used, and zero waste water during the ultrafiltration process

Specifications

Micron Rating	0.02 micron UF membrane 0.5 micron carbon block filter
Flow rate	8 GPM
Maintenance Schedule	Turn valve to flush membrane when full. Replace membrane every 3 - 5 years; replace carbon filter at least once per year
Size	28" H X 20" W X 11" D (Bracketed unit) 31" H X 20" W X 11" D (Floor stand unit)

Contaminant Reduction / Removal

- Algae • Bacteria • Benzene • Chlorine • Chloramine
- Cloudiness / turbidity • Colloidal silicas • Cysts
- Cryptosporidium • Dirt • Ferric (oxidized) iron • Giardia
- Inorganic materials • Lead particulate • Mold
- MTBE (methyl tertiary butyl ether) • Organic materials
- Perfluorooctanesulfonic acid (PFOS)
- Perfluorooctanoic acid (PFOA) • Pesticides • Protozoa
- Radon • Sand • Scale • Sediment • Silt
- THMs (trihalomethanes) • VOCs (volatile organic compounds) • And more!
